Managing Partner, Joshua T Lange

The shaking of the vehicle as it drives across the Grizzly™ Trackout Control Device knocks dust, mud & other debris off the vehicle tires and chassis, which would typically be tracked out on to the roadway.

GRIZZLY™

Trackout Control Device

GRIZZLY™

Trackout Control Device

- ▶ **MINIMIZE** trackout from your jobsite
- ▶ **PATENTED** method to minimize the tracking out of dirt, mud, dust and debris*
- ▶ **RECOGNIZED** innovation that is an improved method to control trackout at construction sites or anywhere an unpaved dirt roadway abuts or tracks dirt onto paved roadways
- ▶ **REUSABLE**, transportable, and scalable; can be expanded to any length x width required
- ▶ **REDUCE** the cost of clean-up on the road
- ▶ **PROMOTE** a safe construction site by slowing exiting traffic
- ▶ **HELP** control Particulate Matter (PM10) to help improve air quality

*Patent numbers 6,981,818; 6,881,006; 7,059,799 and 7,775,739

THE GRATE DEVICE:

The Grate Device is available in two dimensions:

- 10' wide x 8' long sections
- 20' wide x 8' long sections

The Grate Device as shown above is 20' wide x 16' long

The Grate Device as shown above is 10' wide x 16' long
